Here is a step by step guide for how to join a Zoom video conference using a video enabled computer or tablet.

1. Click on the link in the Zoom invitation that was sent to you via email. This will launch Zoom in your browser (an internet window). It will look like this:

2. Launch the video conference in browser or in downloaded application:

   If you have the application downloaded, click here

   To join in your browser, without downloading application, click here or here
3. Once you launch the video conference in your browser, the video conference window will open:

![Video Conference Interface]

- Click here to enable audio
- Click here to enable video
- Click here to temporarily mute yourself. Click again to unmute.
- Click here to make video full screen.
- Click here to leave the meeting at any time

4. You should now be in the meeting and can be both seen and heard by other participants.

![Meeting Interface]

- Click here to make video full screen.
- Click here to leave the meeting at any time

Important reminders:

- Remember that if you are unmuted, everyone can hear everything happening around you. If you are in a noisy setting, please mute yourself when not speaking.
- There may be lags and glitches based on internet connection. Please be patient and it should resolve itself.
- You may not be able to join a meeting before its scheduled start time.
