

Are you concerned about water pollution?

- 💧 Is there a drainage problem in your neighborhood that you want to fix?
- 💧 Want to get off the sidelines and make real change?

You don't have to be an expert, we'll show you the way! The Master Water Stewards program is a great opportunity to learn how to solve environmental problems in your community and find a local network of energized leaders.

Master Water Stewards work with their community to:

Assess Watersheds

- 💧 Identify their pollutant sources and create strategies for reducing these pollutants.

Educate Communities

- 💧 Help neighbors understand the most pressing environmental problems in their area.

Reduce Pollutants

- 💧 Work with communities to target pollution sources such as pet waste, fertilizer or pesticides.

Coordinate Action

- 💧 Help communities reduce the polluted runoff by coordinating the installation of rain gardens, rain barrels and other rainscaping techniques.
